

ABSTRACT

A system for managing a development project for a customer includes at least one database having data, and allows the customer to select at least one selected product from at least one of the databases, and provides for viewing at least one selected product. The system allows customer to manage a project through a website and determine how various changes to the project will affect cost, time and other variables. The system can also allow customer to collaborate on a development project with installers, architects and other workers. The system allows customer to match a product to particular requirements. A kiosk system allows customer to view various products within the store, make selections through the kiosk and, potentially, match product to a particular requirement.
